THE UNIVERSITY ALMA MATER

*Hail to Alma Mater!
We will sing thy praise forever;
All thy sons
and daughters
Pledge thee victory and honor.
Alma Mater,
praise be thine,
May thy name forever shine!
Hail to Purple!
Hail to White!
Hail to thee, Northwestern!*

THE CAP AND GOWN

The cap and gown are worn by each participant in the Commencement exercises. The cap is worn throughout the ceremonies, except that men remove their academic caps for the National Anthem, the Invocation, and the Benediction. Gold and silver cords represent the Mortar Board Senior Honor Society. The tassel colors are as follows:

Arts and Sciences	<i>White</i>
Medical	<i>Green</i>
Law	<i>Purple</i>
Speech	<i>Silver Gray</i>
Dental	<i>Lilac</i>
Music	<i>Pink</i>
Graduate School of Management	<i>Acorn</i>
Journalism	<i>Crimson</i>
Education and Social Policy	<i>Light Blue</i>
Technological Institute	<i>Orange</i>
Traffic Institute	<i>Acorn and White</i>
Graduate	<i>Black</i>
Nursing	<i>Gold</i>

Guests are respectfully requested to remain in their seats during the entire ceremony. The aisles of the hall must be kept clear at all times, and those who leave their seats before the close of the ceremony must leave the building immediately through either the north or south door, whichever is closer.

Smoking is permitted only in the outer main floor lobby.

HONORARY DEGREES

SEYMOUR F. SIMON—DOCTOR OF LAWS

J.D., Northwestern University, 1938. Currently a justice of the Illinois Supreme Court, Simon was elected to Phi Beta Kappa as an undergraduate at Northwestern. At the Northwestern School of Law, he graduated first in his class. After working for the Antitrust Division of the United States Department of Justice and serving in the U.S. Navy, he practiced law in Chicago for 30 years. He served for 14 years as a Chicago alderman, for 4 years as president of the Cook County Board of Commissioners, and for 6 years on the Chicago Public Building Commission. He was elected to the Illinois Appellate Court in 1974 and to the Supreme Court in 1980. Widely respected throughout his career for his political independence, Simon has combined independence in his approach to the judicial office with a concern for scholarship and a passion for justice. His opinions demonstrate great intelligence and analytic insight coupled with eloquence of argument. He has staked out a role on the Supreme Court of frequent dissenter, gradually prodding the court to make changes in the law.

Presented by Don H. Reuben, Trustee, Northwestern University

YOICHIRO NAMBU—DOCTOR OF SCIENCE

D. Sc., University of Tokyo, 1952. Currently Henry Pratt Distinguished Service Professor of Physics at University of Chicago, Nambu is recognized as one of the world's leading theoretical physicists. He was largely responsible for formulating quantum chromodynamics and the theory of "strings," leading candidates for the modern theory of strong nuclear forces. He was one of the first elementary-particle physicists to realize the importance of so-called spontaneous symmetry breaking, an essential feature of the modern unified theories of fundamental interactions. His other major contributions to modern physics include the theory of superconductivity and the dispersion theory approach to particle scattering and the production of new particles. He is a member of the National Academy of Sciences and the American Academy of Arts and Sciences, and he has received the United States National Medal of Science, the Japanese Order of Culture, and the Max Planck Medal of the German Physical Society.

Presented by Robert J. Oakes, Professor of Physics and Astronomy, College of Arts and Sciences

ALICE HANSON COOK—DOCTOR OF SCIENCE

B.L., Northwestern University, 1924. Professor emerita at the New York State School of Industrial Relations at Cornell University, she served as the first ombudsman at Cornell and continues to work in and study the field of conflict resolution. As an undergraduate at Northwestern, she was an observer at Hull House, where she developed her interests in labor education, labor relations, and the problems of women in the labor force. Her book *The Working Mother: A Survey of Problems and Programs in Nine Countries* (1975) provided a model for research on the topic and opened up the question of the relationship between work and family. In the forthcoming study *The Most Difficult Revolution? Women in the Trade Union Movement*, she continues the work begun in her edited collection *Women and Trade Unions in Eleven Industrialized Countries* (1984) concerning the lessons for American working women gleaned from a comparative and historical study of trade union experience. Her other recent work on questions of "comparable worth" reflects her ongoing interest in such matters as public policy, interest groups, lobbying, and litigation.

Presented by Arlene K. Daniels, Professor of Sociology, College of Arts and Sciences

ERNEST ROPIEQUET HILGARD—DOCTOR OF SCIENCE

Ph.D., Yale University, 1930. Professor of psychology emeritus at Stanford University, on whose faculty he served for 36 years, Hilgard has been a leading contemporary interpreter of psychology. His work has greatly influenced those who seek scientific explanations of human behavior. More than a generation of undergraduate students have studied from his text *Introduction to Psychology*; this book, now in its ninth edition, has combined scholarly thoroughness with liveliness of presentation. His *Theories of Learning* (1948), now in its fifth edition, serves as the definitive analysis of theories in that central area of psychology. His pioneering research on hypnotism has informed debate over the nature of consciousness. His most recent book, *Psychology in America: A Historical Survey* (1987), offers a comprehensive study of the growth of that discipline. He is a former president of the American Psychological Association and is the recipient of numerous prizes for his contributions to the science of psychology. He served as dean of the Graduate School at Stanford and is a member of the National Academy of Sciences.

Presented by B. Claude Mathis, Professor of Education, School of Education and Social Policy; Professor of Psychology, College of Arts and Sciences

FRANK W. CONSIDINE—DOCTOR OF HUMANE LETTERS

Ph.B., Loyola University of Chicago, 1943. Currently chairman of the board, president, and chief executive officer of the National Can Corporation, he began his career in the entertainment business, spent three years in the U.S. Navy, and later entered the packaging industry. Hired as general sales manager of National Can in 1961, he was promoted to vice president of sales three months later. He became president in 1969, chief executive in 1973, and chairman in 1983. A director and regional vice chairman of the United States Chamber of Commerce, he is also active in Chicago-area cultural and civic affairs. He is a board member of the Field Museum of Natural History, the Lyric Opera of Chicago, and the Museum of Science and Industry. Considered has served as a member of Chicago United, as deputy chairman of the Chicago World's Fair 1992 Authority, and as chairman of the U.S. section of the Egypt-U.S. Business Council, formed to promote a stable economy in Egypt. Active in the affairs of the Roman Catholic Archdiocese of Chicago, he received the Humanitarian Award from the National Jewish Hospital in 1980.

Presented by Thomas G. Ayers, Trustee, Northwestern University

SUSUMU TONEGAWA—DOCTOR OF SCIENCE

Ph.D., University of California, San Diego, 1968. Currently professor of biology at the Massachusetts Institute of Technology, Tonegawa discovered the genetic mechanisms responsible for the impressively diverse antibody repertoire that allows the body to neutralize and protect itself from the many viruses, bacteria, and other agents to which it is constantly exposed. It turns out that the potential of the host to generate millions of different antibodies is achieved by the biological maneuver of rearranging various sets of specific genes. The solution of this important biological puzzle offers great promise in the effort to develop better strategies to combat infectious diseases and ultimately, perhaps, even cancer. He has received numerous honors, including the prestigious Landsteiner Prize from West Germany and the Order of Culture "Bunkakunsho" from the emperor of Japan. Tonegawa is a member of the American Academy of Arts and Letters and a foreign associate of the National Academy of Sciences.

Presented by Susan K. Pierce, Professor of Biochemistry, Molecular Biology and Cell Biology, College of Arts and Sciences

FRANK EDWIN RICHART, JR.—DOCTOR OF SCIENCE

Ph.D., University of Illinois, 1948. Walter Johnson Emmons Distinguished Professor of Civil Engineering Emeritus at the University of Michigan, Richart is author of more than 70 technical publications, which have formed the basis for the civil engineering specialty known as soil dynamics. Although educated in engineering mechanics and structural engineering, he soon turned his attention to the emerging discipline of geotechnical engineering. He synthesized the principles of theoretical mechanics and the complicated mechanical properties of real soils to produce a readily usable procedure for the analysis and design of soil structures and foundations subjected to dynamic excitations due to wind, waves, earthquakes, machinery, or blasting. Richart's book *Vibrations of Soils and Foundations* (1970) is recognized as the authoritative treatment of the subject and has been widely translated. He has served as a consultant to numerous government agencies and private companies and is a member of the National Academy of Engineering.

Presented by Bruno A. Boley, Walter P. Murphy Professor of Engineering, Professor of Civil Engineering, Technological Institute
